

Join a children's health study

PFAS-REACH

PFAS Research, Education,
and Action for Community Health

APPROVED

By NU IRB at 10:32 am, Oct 06, 2020

Are you interested in learning how to protect your child from contaminants in drinking water?

The PFAS-REACH study is enrolling families of preschool-aged children in Hyannis. We are studying how contaminants called PFAS may affect children's health. PFAS chemicals have been found in drinking water in Hyannis.

Participants will be asked to fill out a questionnaire, provide a sample of their child's blood and urine, and respond to periodic text messages from our scientists about their child's health.

Participants will receive a customized report with their results and up to \$100 in gift cards.
